(54) Title: METHOD AND SYSTEM FOR MAKING ONE OR MORE PARTS OF A RECORDED DATA SEQUENCE

(57) Abstract: Method for marking one or more parts of a recorded data sequence, and recording device comprising a data buffer (17), a recording unit (18), and a processor (11) for displaying a representation of a recorded data sequence stored in the data buffer (17), and for receiving user inputs from function keys (13-15). The processor is arranged for dividing the range in a first sub range and a second sub range. If the pointer is in a range of unmarked data and a first function input is received from the function keys (14, 15), the first sub range is unmarked and the second sub range is marked. If the pointer is in a range of marked data and a second function input is received from the function keys (14, 15), the first sub range is marked and the second sub range is unmarked.
